TIM Software	Enter TIM Software and Version
Terminal Type	DX8000 Portable Pinpad
Terminal Software	AX_EP2_810_26_010
Terminal ID (TID)	25496729

The document does not guarantee error-free status of the tested integration.

The successful completion of testing and issuance of this validation document signifies that the implementation was tested in line with the current form and has been approved for use with TIM software and payment terminals by Worldline. It should be noted that tests only concern a snapshot of circumstances. Future changes may lead to the need for renewed testing. When new terminal functions are deployed, the integrator is not released from the obligation to ensure compatibility with the newly released Worldline software.

The integrator is also required to stay up-to-date regarding the ongoing development of software by Worldline and to incorporate any necessary improvements at their own expense.

Information regarding the latest developments can be obtained via the Extranet platform or from a dedicated account or partner manager.

For support on productive terminals, please contact <https://support.worldline.com/>. Get in touch with your local support contact point by selecting the country closest to where your business is based.

Kind regards,

POS-Integration Worldline
